

Spare parts and more!

Our Company

Established in 2003 by Mr. Peter Meyer who looks back at many years of experience in the B2B export and trading business. The company is now second-generation family owned after his daughter Kerstin and son-in-law René have joined m.e.c. in early 2014. Both Kerstin and René came from a business background and brought several years of experience with them.

Products and Services are technical equipment and spare parts for the marine industry, power plants, oil and gas fields, the cement industry and construction vehicles. Some clients appoint us as their purchasing agent to optimise inventory management costs. We are able to identify and locate hard-to-find-items and deliver general sourcing.

We also supply high quality hospital und laboratory equipment. We are also able to provide individual solutions for solar plants.

Merging with DESTEC (established 1998) took effect on January 1st in 2013 to consolidate both companies for a stronger positioning in the market and to benefit from synergies of similar activities. Consequently, m.e.c. is the legal successor of all contracts, assets and obligations and staff members of both companies continued working for m.e.c.

Additional Activities include complete compressor stations for cement conveying, spare parts packages for railway engines or fire fighting pump systems and even a horizontal boring machine and second hand wheel loaders.

Our customers range from trading companies and ship owners to industrial enterprises and the Navy. We perform business in the Middle East, Southeast Asia and Europe.

Services

We offer a variety of services to accustom to our customers' requirements. Do not hesitate to contact us for more information.

- Supply Chain Management
- Purchasing House
- Handling & Storage in our warehouse in Hamburg
- Ship Chandling for various kinds of Vessels

Products

Manufacturer	Product Type
